

# LAWN CARE CALENDAR

## JANUARY

- Check the soil is holding enough water- you may need to add a wetting agent (E.g. Lawn Solutions Australia's Lawn Soaker).
- Water your lawn regularly unless receiving good rainfall.

## FEBRUARY

- Check for pests. Apply lawn grub control if required.
- Apply a pre-emergent herbicide to prevent any weeds from germinating (E.g. Lawn Solutions Australia's OxaFert).

## MARCH

- Apply preventative lawn grub control (E.g. Lawn Solutions Australia's Acelepryn GR).

## APRIL

- Aerate to relieve compaction.
- Fertilise to replace lost nutrients.
- Increase mower height to promote greater leaf exposure to the sun.
- Use ColourGuard to maintain your lawns natural green colour.

## MAY

- Apply ColourGuard, a natural grass pigment to instantly restore the colour of your lawn.

## JUNE

- Decrease mowing frequency.
- Maintain colour with ColourGuard.

## JULY

- Check soil pH to ensure an optimal range for nutrient absorption.
- Maintain colour with ColourGuard.

## AUGUST

- Maintain colour with ColourGuard.
- Check soil pH to ensure an optimal range for nutrient absorption.

## SEPTEMBER

- Check soil pH.
- Fertilise to replace lost nutrients.
- Apply lawn grub control if required.
- Apply a pre-emergent herbicide to prevent any weeds from germinating.

## OCTOBER

- Apply preventative lawn grub control (E.g. Lawn Solutions Australia's Acelepryn GR).
- Aerate to relieve soil compaction.
- De-thatch to allow nutrients to reach your lawn and soil.
- Top-dress to correct uneven areas in your lawn.

## NOVEMBER

- De-thatch to allow nutrients to reach your lawn and soil.
- Top-dress to correct uneven areas in your lawn.

## DECEMBER

- Fertilise to replace lost nutrients.
- Water your lawn regularly unless receiving good rainfall.
- Decrease mowing height (no more than 1/3 of the leaf taken off at a time).

\*The Turf Lawn Care Calendar is a guide only, illustrating the ideal time of year to carry out these actions on your lawn. Carrying out each action is also subject to weather conditions, turf variety, soil type, etc. For more information please contact our lawn care experts on
